

Community Cop Cards sticker information:

Club or Organisation

Purpose– This sticker is designed to help connect pupils with organisations or clubs within their area.

Approach- Within every community who have contributed to the funding of the Community Cop Cards scheme are clubs and organisations specifically aimed towards young adults. Research has shown that as well as learning great new skills and having some unique and exciting opportunities young adults who have increased participation in organised recreational activities reduces exposure to, and engagement in anti-social behaviour.

Tasks to complete to receive the sticker- Some children may already be involved in a club or organisation, but for those who are not, it is to encourage them to try something new. Perhaps they can ask one of their friends if they can attend with them for a taster or a group of friends could all try out a local youth club together.

Children can either bring in a trophy, certificate or something from their current club or organisation or they can get a scout leader, youth club worker, karate master etc. to sign the black and white sticker book. When they have provided you with a piece of evidence, you can reward them with a sticker. This is sticker is designed for pupils to attend a club or organisation outside of school and not to be awarded for afterschool clubs.

Resources to use- On the webpage the following information is available as resources for the children:
