**Subject:** Proposed modifications to Local Plan

Dear Sirs,

Here is our comment on the proposed modification to the Local Plan in particular regarding the area around Princes Risborough.

The basis on which the modification is prepared is flawed in that it is based on anticipated housing demand calculated five years ago and ignores the fact that the expected demand was dramatically reduced in figures subsequently prepared by the ONS in 2016.

Therefore, the proposed housing numbers are significantly over estimated.

This, combined with the fact that account has apparently not been taken of future availability of existing housing stock means that far more houses are being proposed than will be necessary to meet demand with the consequent waste of money and damage to the environment.

Yours faithfully

Andrew and Caroline Preece
