Subject: New local PPlan for Princes Risborough

Dear Sirs, Madames and Inspector,

On reading the New local Plan one point stands out: that serving the present town are the rail and road access networks that are proven inadequate as by the twice daily traffic jam on the main A410 serving the 2 major towns in the county and the two major emergency hospitals!

The WDC has offered a cheaper solution to a complete by-pass and incorporated it into the new local plan. It is to have half a by-pass (a filter road) leading greater volumes of traffic into the station area. This will be half as effective and will not alleviate congestion on the main A410 but just add access difficulty to an area also wished to be built on in the present plan. Compounding situations. Hybrid solutions give hybrid results that please nobody. The Shootacre and Picts lane plans are complications waiting to happen.

Yours sincerely
John R Martin hall
