I agree with the abandonment of the link road but not with all of the reasons you quote.

My own views are these:

West Street and its historic environment would be improved by a roundabout sited between the car-park and the Oxford Road; the congestion caused at this point ( and the added emission of carbon monoxide fumes) is considerable.

The historic environment of the High Street would be improved if delivery lorries had access from West St., to the site, for loading to the rear of the shops in the High Street. This access could be screened by trees.
