The council is proposing major growth for Princes Risborough. Many people are asking how the infrastructure in Princes Risborough will cope.

Alongside the new houses we are planning:

- two new primary schools
- extra funding for more students at the School
- adding to local grammar school provision
- a new road to help take traffic off the main A4010
- new public green spaces
- alternative location for a new GP centre for the town
- new sports and recreation facilities.

This is a big change for the town, which is why we created a special Steering Group made up of local representatives. Over the last three years they have been helping us to shape the proposals for Princes Risborough which we are presenting in this preview of the local plan.
